What are the outliers for the given data set below.
7, 23, 26, 27, 28, 30, 31, 34, 34

Select one:

1,3
 31,33
 30,31
 1,33
 No outliers

Which of the following would fit the definition of "statistical independence" of events A and B?

Select one:

- $P(A | B) = P(A) + P(B)$
- $P(A | B) = P(A \text{ and } B)/P(B)$
- $P(A | B) = P(B)$
- $P(A \text{ and } B) = P(A)$
- None of the above

Let E be an event and E' is its complement. If $P(E) = 1/3$, what is $P(E')$?

Select one:

- $P(E') = P(E) = 1/3$
- $P(E') = P(E) - 1 = -2/3$
- $P(E') = 2 * P(E) = 2/3$
- $P(E') = 1 - P(E) = 2/3$
- None of the above

A machine produces parts that are either good (90%), slightly defective (2%), or obviously defective (8%). Produced parts get passed through an automatic inspection machine, which is able to detect any part that is obviously defective and discard it. The machine passes the part if it is not obviously defective. If it makes through the inspection machine and get shipped, what is the probability that it is a good quality part?

Select one:

- 0.9
- 0.978
- 0.742
- 0.685
- None of the above

g question

Suppose in a town three candidates are running for the mayor's seat. To predict the winning candidate, a newspaper selects 25 registered voters randomly and the following info about each respondents' choice.

C C A B C C B C B A B C A B A C C A B A B C C

Choose the correct statement.

Select one:

- Population size is 25
- Sample size is not given
- Population is all registered voters in the town at the time of the study.
- Cannot identify a variable from the description
- None of the above
